

## Assessment Criteria: (Activity 2.2 | Coding Fundamentals: Apply and Prove (Online & Workplace))

### Behaviour Learning Outcome:

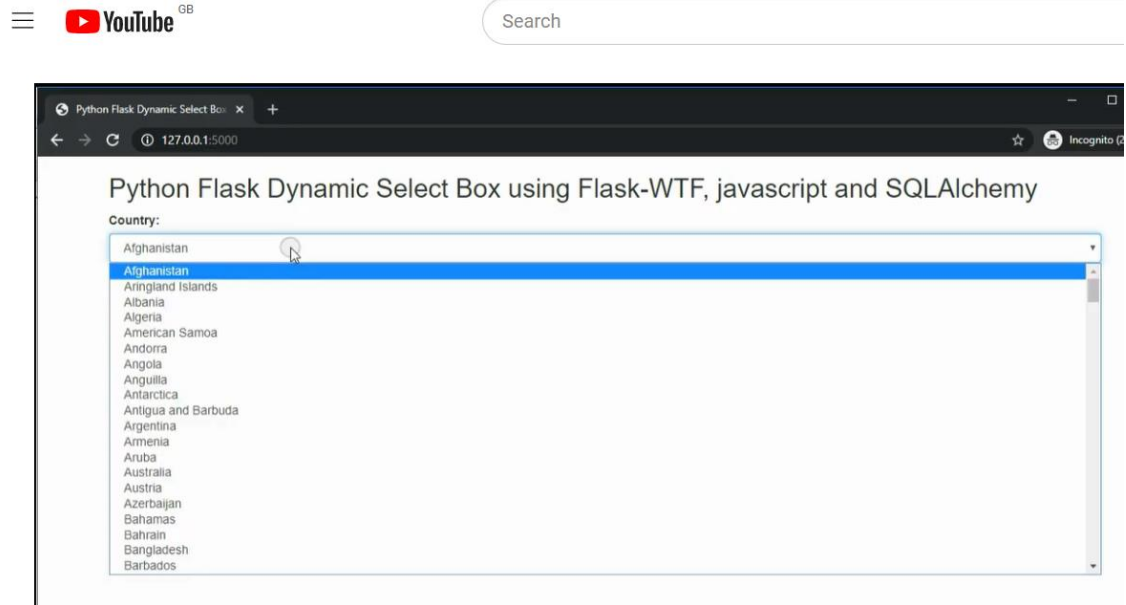

<p><b>B1:</b></p> <p>Exhibits enthusiasm, openness and an aptitude</p>	<p><b>Email exchange 1:</b> between my manager and myself.</p> <p>Hi Jonny,</p> <p>Can you please give me a python project/exercise on which I can work?</p> <p>This project will become a part of my main portfolio and is also one of the activities from QA. QA has given the below <b>Activity outline</b>.</p> <p>In this activity, you will:</p> <ul style="list-style-type: none"><li>• Create a Python application that you will subsequently run through a basic CI pipeline.</li><li>• Document the project context as well as the design of your application and pipeline.</li><li>• Push your project to an appropriate repository.</li></ul> <p>We recommend that you collaborate with your employer so that you can identify appropriate examples to use. We understand that some data may be sensitive, you are welcome to anonymise this.</p> <p><b>Purvi Thakkar</b>   Jr DevOps Engineer</p> <p><b>Email exchange 2:</b> between my manager and myself.</p> <p>Hi Jonny,</p> <p>Can we have a 10 min call anytime today? I want to share the progress and get insights if I am on the right path.</p> <p><b>Purvi Thakkar</b>   Jr DevOps Engineer</p>
<p><b>B2:</b></p> <p>Invests time and effort in their own development</p>	<p><b>Tutorials:</b> from geekforgeeks</p> 
<p><b>B3:</b></p> <p>Displays a commitment to the mantra 'You build it, you run it'</p>	

## Skills Learning Outcome:

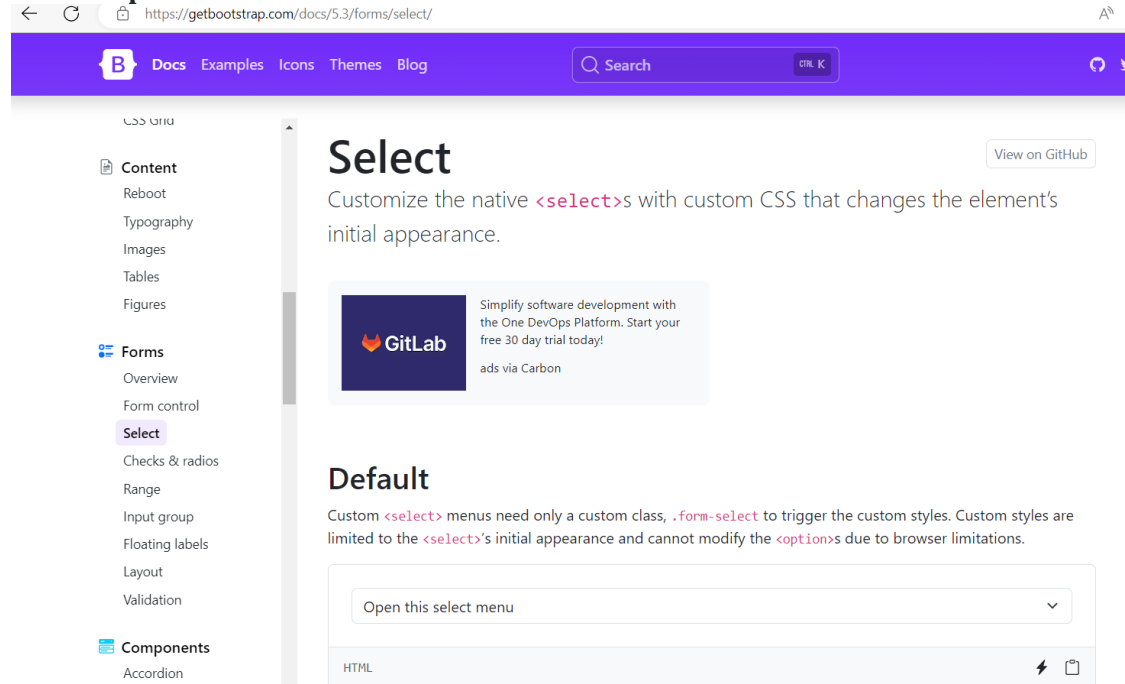

S16:

Invest in continuous learning

## YouTube Videos:

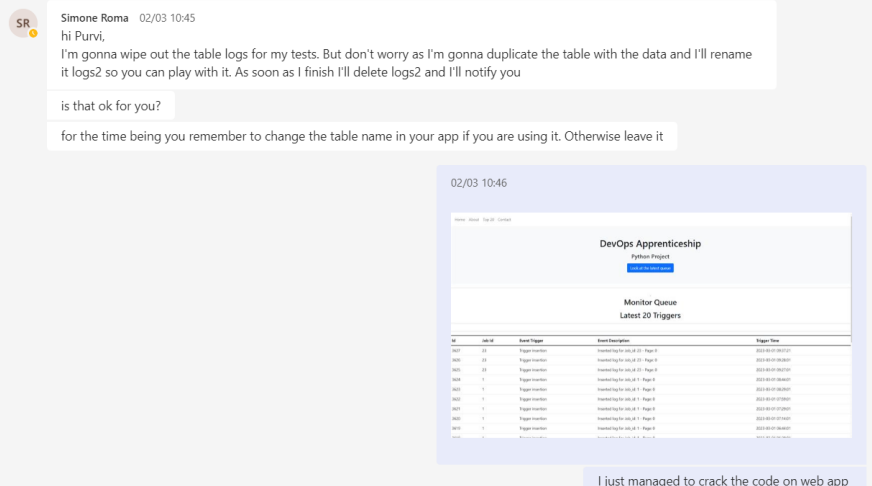

## Bootstrap:

S1:

Communicate credibly

## Teams chat: Topic – SQL database name

- 2. **Progress 2:** Connect to the database and view the top 20 queues on the Top20 web page.
- 3. **Progress 3:** Add the Top50 page to show the latest 50 queues from the Monitor database. Add the Top100 page to show the latest 100 queues from the Monitor database.
- 4. **Progress 4:** Job Id page added, which uses the GET method to take input from the user and displays the database as per user input using the POST method.
- 5. **Progress 5:** Run pytest to view all the functions running smoothly.
- 6. **Progress 6:** Install Pylint and run app.py - fix the issues – scored 10.00 /10.
- 7. **Progress 7:** Capture screenshots of all the pages
- 8. **Progress 8:** Create a Readme file to display project information.

Project artifacts:

User stories:	As a user, I want to view the latest triggers online quickly and easily. So that I can save time and avoid the hassle of going to the portal and tracking the latest queues.
---------------	---

In this user story, the users are the employees of S2R Analytics who need to track the latest triggers (queues). The user's goal is to save time and avoid the inconvenience of physically going to the database. This user story would be used to guide the development of a web app that meets the needs of busy employees.

## Project outcome:

S13:

Engage in productive pair/mob programming

Email exchange between my manager and myself.

**Subject:** Is your project in GitLab?

If not, can you put it in the Prototype group and send me a link to the repo.

Then I can prepare some feedback, recommendations, and the next set of requirements. I would like to build on this and have the App also update the Schedule.

Many thanks,

Jonny

**Jonny Gray** | Founder & Solutions Lead

**Purvi Thakkar**  
To 🟡 Jonny Gray

Hi Jonny,

The project link is here: <https://gitlab.com/s2ranalytics/prototyping/monitor-queues.git>

Thank you, and I look forward to the feedback and recommendation.

**Purvi Thakkar** | Jr DevOps Engineer

S22:

Incremental refactoring

**Teams chat:** Topic – Add more functionalities on the web app

**Jonny Gray** 02/03 08:48  
Hi. Just waiting for Freddie to be picked up. Should be free at 9

02/03 08:49

Sure, in the meantime, I will send you a teams link

02/03 10:48

ID	Job ID	Event Trigger	Event Description	Trigger Time

**Jonny Gray** 02/03 10:50  
Good.

Can you remove the apprenticeship reference etc. as we would like to be able to use this

02/03 10:50

Sure!

**Jonny Gray** 02/03 10:51  
Then you can think of some other options, so we have a button for top 20 (call it last 20), you can add an option for last 100, you can search for a specific job id or a date range.

21 def contactus():
22     """ Contact page function"""
23     return render_template("contactus.html")
```

S11:

Employ a systematic approach to solving problems

My unit test kept failing, and then I tried pytest, which failed a few times. Then I googled the error and tried a couple of solutions I found of stack overflow. Finally, the tests were passed.

#### Failed:

```
✖ Tests failed: 1 of 1 test – 0 ms

test_app.py::test_home FAILED [100%]
test_app.py:0 (test_home)
pytestconfig = <_pytest.config.Config object at 0x000001C75B86FF10>

    def test_home(pytestconfig):
>         response = pytestconfig.get("/")
E         AttributeError: 'Config' object has no attribute 'get'

test_app.py:2: AttributeError

===== 1 failed in 0.26s =====

Process finished with exit code 1
```

#### Passed:

```
Run: Python tests in test_app.py x
> Tests passed: 10 of 10 tests – 40 ms

> Test Results 40 ms C:\Users\PurviThakkar\PycharmProjects\pythonProject2\test
